USER GROWTH ANALYTICS | PRODUCT DATA SCIENCE

Summer 2027 availability: May - August 2027 (12+ weeks)

Profile: USC Spatial Data Science master's candidate connecting user growth with product analytics. Work on overseas GTM for a senior-dog care platform with a 13,000+ pet-owner community; manage the USC Chinese Program's official Instagram and have published RedNote posts with 50K+ views.

Education

University of Southern California (USC) — **Los Angeles, CA**
M.S. in Spatial Data Science, GPA: 3.9/4.0 — *Jan 2026 - Dec 2027*
Relevant Coursework: Machine Learning for Data Science, Principles of Programming for Data Science, Database Principles, Spatial Analysis and Modeling, Computer Graphics

Hangzhou Normal University — **Hangzhou, China**
B.S. in Geographic Information Science, GPA: 3.75/4.0 — *Sep 2021 - Jun 2025*

Work Experience

Huaxin Consulting Design & Research Institute / China Telecom AI — **Hangzhou, China**
Product Manager / Technical Program Manager (Full-time) — *Jun 2025 - Dec 2025*

- Owned **3 enterprise AI and data products** from customer discovery and requirements through engineering acceptance, launch, and iteration; defined success criteria and achieved **100% on-time delivery** and **90% client satisfaction**.
- Coordinated **8 engineering workstreams** for China Telecom's Xirang MaaS platform, resolved **12+ API, data-flow, workflow, and access-control blockers**, and shipped a critical module 3 days early.
- Presented technical product narratives in English to Saudi and Brazilian stakeholders, connecting architecture, product value, and ROI to support **2 international cooperation agreements**.

Huaxin Consulting Design & Research Institute / China Telecom AI — **Hangzhou, China**
AI Development Engineer / Intelligent Solutions Engineer (Intern) — *Dec 2024 - May 2025*

- Built Python cleaning, tokenization, and evaluation workflows across **2M+ GenAI records**, improving Precision and Recall by **12%**; developed a Java crawler across **31 procurement platforms** with validation error below **1%**.

WoafMeow — **Overseas Markets**
GTM & International Growth — *2026 - Present*

- Work on overseas GTM and user growth for WoafMeow, a **funded senior-dog care venture** with a **13,000+ pet-owner community**.
- Segment pet owners by senior-dog care needs and feedback; use **website click-through rate** and **Discord-to-coffee-chat registration conversion** to identify high-intent cohorts for overseas outreach.
- **A/B test** user-facing growth messages against those funnel metrics, then translate recurring feedback and feature requests into priorities for the WoafyPet Smart Bed and Smart Base.

USC East Asian Languages and Cultures — **Los Angeles, CA**
Graduate Teaching Assistant (Chinese Program) — *2026 - Present*

- Manage the USC Chinese Program's official Instagram account; added **270 followers in two months through organic content alone** by planning and publishing posts, while supporting department-wide student communications and multi-instructor operations.

Kimber Health — **Los Angeles, CA / Hybrid**
Campus Growth Ambassador — *Jan 2026 - Feb 2026*

- Executed campus acquisition across USC, UCSD, and UCI, built student communities totaling **1,000 members**, and achieved a **15% attributed purchase conversion rate** through tracked referral channels.

Spatial Sciences Institute, University of Southern California — **Los Angeles, CA**
Graduate Research Assistant — *Mar 2026 - Present*

- Translate faculty and municipal questions into product metrics, data models, and user-facing decision workflows; build React, Mapbox/ArcGIS, and PostgreSQL/PostGIS applications for environmental and LA 2028 accessibility research.
- Develop Python and SQL pipelines across **1M+ multi-source records**, perform schema and statistical quality checks, and turn complex spatial findings into recommendations for technical and non-technical stakeholders.

Work Experience (Continued)

Uni Express Inc. (UniUni) **Los Angeles, CA / Remote**
Regional Expansion & CDC Specialist Intern *Jul 2026 - Sep 2026*

- Researched **5,000+ North American and European logistics companies**, segmented **3,500 priority accounts**, and mapped operations, supply-chain needs, and partnership decision makers.
- Converted **all 3 qualified positive responses** into discovery meetings and synthesized customer signals into regional product, partnership, and GTM recommendations for last-mile expansion.

Ouhai Surveying and Mapping Institute **Wenzhou, China**
Spatial Data Analyst Intern *Jun 2024 - Sep 2024*

- Processed **100+ GB** of multisource satellite imagery, delivered **20+ analytical dashboards**, and built ArcGIS models that improved land-area calculation efficiency by **30%** for government planning.

Leadership

USC Society of Engineers, Scientists and Entrepreneurs (SESE) **Los Angeles, CA**
Co-Founder & Vice President *Mar 2026 - Present*

- Built a **20-member operating team** and **300+ member community**; led partnerships, sponsorship development, and events connecting students with founders and employers.

Selected Growth, Data and Product Projects

- **RedNote Content Growth:** Independently run a personal content channel; published multiple posts with **50K+ views** and one with **3K+ likes**, using performance data and audience feedback to refine content.
- **Seattle Collision Analysis, Severity Prediction, and Dashboard:** Analyzed 16,608 SDOT records across time, weather, road conditions, collision type, and location; identified severity drivers, documented missingness and non-causal limits, and built one interactive Python/JavaScript/Leaflet system for linked exploration and future holdout-validated model outputs.
- **Marine Eco-Remote Sensing Big Data Platform:** Processed 100+ GB of spatial data and improved LSTM forecasting accuracy by 10%; won the national grand prize, ranking top 1% among 7,000+ teams.
- **Intelligent Multi-UAV Collaborative Management System:** As Team Lead and Product Manager, translated emergency-response scenarios into user needs, architecture, coordination workflows, and a roadmap; won a national third prize, top 3% among 8,801 teams.
- **Enterprise AI Product Portfolio:** Managed an intelligent tender platform, a government assessment and fire-safety cloud, and an autonomous inspection system spanning document intelligence, anomaly detection, sensor monitoring, and multi-robot dispatch.

Research, Intellectual Property & Recognition

- **Publications:** Co-author, 'Assessment of Satellite Products in Estimating Tropical Cyclone Remote Precipitation over the Yangtze River Delta Region,' *Atmosphere*, 2024 (SCI, IF 2.9); co-author, multisource remote-sensing monitoring methods for wetland lake-chain water quality, *Journal of Hangzhou Normal University*, 2024.
- **Software Copyrights:** Lead author of 3 registered remote-sensing systems covering Sentinel-2 algae-bloom inversion, water-color index extraction, and aerosol optical-depth inversion.
- **Recognition:** National Grand Prize (top 1%); National Third Prize (top 3%); Zhejiang Province Second Prize; Google Launchpad for Women APAC Generative AI Leadership Program; GRE 326.

Skills

Data Science: Python, SQL, R, MATLAB, machine learning, LSTM, forecasting, classification, data mining, Precision/Recall, experiment design, product analytics, model evaluation, data visualization
Product and User Growth: Social content operations, audience feedback, conversion tracking, user research synthesis, customer discovery, KPI design, segmentation, PRDs, roadmap prioritization, growth strategy
Engineering and Spatial: Java, JavaScript/React, PostgreSQL/PostGIS, data pipelines, Git/GitHub, ArcGIS Pro, Mapbox, ENVI, remote sensing, Web GIS
Tools: Figma, Axure, Excel/Google Sheets, PowerPoint
Languages: English, Mandarin
